

A modern living room featuring a light-colored wood panel wall. A large, dark TV is mounted on the wall above a fireplace with a fire burning. To the left and right of the fireplace are built-in wooden shelves. On the left shelf, there are several white bowls. On the right shelf, there are two white ceramic objects and a stack of books. In the foreground, there is a round wooden coffee table with a vase of green flowers and a small white bowl. A brown leather chair with a white knitted pillow is on the right. The ceiling has a white beam structure.

Creative Lighting

PRESENTATION

ARCHITECTURAL  
TECHNICAL  
MINIMAL  
**LIGHTING**

Since 2010 developing expertise in the conception of architectural and technical lighting.

Each project has fully customizable options in terms of dimensions, finishes and formats, to fit the most complex arrangement, from a commercial space to a residential or even a corporate area.

Permanently focused on the excellence of improving design solutions, Begolux presents versatile and adequate architectural lighting solutions with high aesthetics and functional components.

# CORE BUSINESS

Begolux has its core business established in the manufacture of luminaires for indoor and outdoor lighting projects.

In an increasingly demanding market, Begolux stands out for its national production, from the idealization of the luminaire to the final product, ensuring a competitive advantage of reduced cost, without neglecting the quality and excellence of the piece.

With a short lead time, the company ensures efficiency and speed in processing the order.

“CREATIVITY INVOLVES TWO PROCESSES:  
THINKING, THEN PRODUCING.”

- LINDA NAIMAN

# PRODUCT RANGE

Architectural lighting design urges for different possibilities when incorporating the perfect light in each project.

The available collections were developed to be able to adapt, allowing a highly customization for each project.

Each range is composed by products with several possible applications, to ensure you have the design needed and are able to combine them.

# CUSTOMIZATION & BESPOKE

The products in the catalog can be customized according to the finishes, dimensions and components available. Bespoke service available to develop project-oriented designs for specific needs.

## AVAILABLE COLORS

## NATURAL MATERIALS FINISHES

## REFLECTORS

# SCALA CAFFE

Located by the beach, Scalla Caffè is a Begolux restaurant project.

This project sought to highlight the simplicity and timelessness of the luminaires, giving the space a sophisticated and welcoming atmosphere.

The spaciousness of the space made it possible to combine several luminaires, all different from each other, but all aligned to create a harmonious play of light with personality.

# STARTUP BARREIRO

StartUp Barreiro is a business incubator that seeks to create an entrepreneurial culture by promoting and supporting new initiatives.

The space has Begolux lighting to meet its different needs, while maintaining its sober identity.

With different work areas, there was a need to use luminaires from different ranges, trying to differentiate the work area from the leisure area.

The use of different lighting pieces made it possible to adjust the luminous flux characteristics according to the requirements of the area.

# B&B HOTEL

## SANTO TIRSO

The B&B Hotel in Santo Tirso is a hospitality project that stands out for its careful approach to lighting, relying on Begolux to create a unique atmosphere.

Considering the essence of the space, the emphasis was on ensuring a positive and pleasant experience for guests, from the beginning to the end of the day. A uniform and harmonious light flow was crucial for the project to fulfill its objective.

# AGRESTELUZ OFFICES

Creating a functional space while providing a pleasant environment for AgresteLuz employees were two principles that guided the design of this corporate project.

With Begolux lighting, the final project is characterized by being a balanced space, where the physical and emotional requirements of the employees are met.

Consisting of several sections, the lighting planning for AgresteLuz's office space focused on the needs and purposes of each area, both for relaxation and work, thus seeking to understand the best type of lighting for the specific area.

# ARTOMCOR

An industrial concept building was developed, which met the various functional requirements, such as light and a constant interior temperature.

Light was an essential part of this project. It was imperative to show the real color of the materials being worked on there, with continuous and constant light, without major variations throughout the day, without projecting shadows onto the work being done there and with a light temperature close to natural light.

The Begolux luminaires made it possible to trace a path of light throughout the building, with a simple and minimal language that blends in perfectly with the architectural choices, creating at certain points a harmony between its light and the light projected from outside, with games that add beauty to the space.
